

Warehouse Transfer

The system manages multiple warehouse facilities, therefore licensed and non-licensed inventory can be moved from one warehouse location to another warehouse location.

Perform Cycle / Physical Count

and license information. Or, the user can perform a full inventory physical count of the entire warehouse.

Pick Inventory for Outbound Order

After orders are released, inventory is allocated, and pick lists are created based upon user defined pick rules. Users first select the pick list from the queue and then select the pick task. The user confirms the designated pick location, item, quantity, and lot or license. The user can drop off the load to the designated staging / shipping location or continuing picking finished goods and building the load until it is full.

Perform Order Inspection

Customer orders may require finished good inspection before the goods are shipped. In this case, the
